

Lafollette #2 looking towards Kings
Hill Lift Station

Proposed Route of Dry Fork Interceptor

The long-range projects are estimates and are intended to provide the City with notice of some potential projects in the future. **One of the proposals the State is currently evaluating is making the closest Public Utility collect failing septic systems even if the failing system is not in the City Limits.**

W control is going to be a constant battle for the City and should be viewed as a reoccurring maintenance expense instead of a one time capital outlay.

Depending on the actual flows experienced, and the level of maintenance
